Core Java Course Content

Welcome to our **Core Java Online Training**, the ultimate destination for mastering the fundamentals of Java programming. Our **Core Java Online Course** is designed to provide you with a solid foundation in Core Java, enabling you to develop robust applications and understand advanced concepts in Java development

Core Java

8. What is Programming Language?

9. Types of programming languages

10. Java Introduction

11. History of Java

12. Principles of Java

13. Java Installation

14. Java Program Execution Flow

15. JDK vs JRE

16. JVM Architecture

17. Identifiers & Keywords

18. Data Types

19. Variables

20. Methods

21. Arrays

22. Strings Handling

23. Object Oriented Principles

24. Constructors

25. Interfaces

26. Programs related to OOPs

27. Final classes

28. Abstract Class

29. Exception handling

30. Multi-Threading

31. Wrapper classes

32. Auto Boxing, Un-Boxing

33. Java Memory Management

34. Introduction to Collection Framework

35. List

36. Set

37. Map

38. Properties

39. Java 8 Features Introduction

40. Lambda Expressions

41. Functional Interfaces

42. Default & Static Methods

43. Method References

44. Date and Time API changes

45. Stream API
